FM2500DD

18cm down draught for worktop extraction.

- Down draught extractor
- Touch controls
- Variable 4 speed control including 1 intensive setting
- 2 heights of operation, fully retracts to worktop level when not in use
- Delayed switch off timer and auto safety switch off

PERFORMANCE
480m³/h extraction rate
65dB(A) noise level
Extraction and recirculation
Removes grease and odours directly from the cooking area
REASSURANCE
Washable aluminium grease filter
Charcoal filter as an optional extra (type 2S)
DESIGN
For worktop installation
FLEXISTRIP: Stainless steel look strip (optional extra)

HD8890

Front-line Future 90cm chimney hood.

- Touch controls with LED display
- Variable 4 speed control including 1 intensive setting
- Delayed switch off timer and auto safety switch off

PERFORMANCE
670m³/h extraction rate
63dB(A) noise level
Extraction and recirculation
REASSURANCE
2 washable aluminium dishwasher safe grease filter cassettes
Long life charcoal filter included (type 20)
DESIGN
2 x halogen lights
For wall mounting or installation between furniture

Hoods

With a variety of sizes and the choice of extraction or recirculation mode, AEG-Electrolux has a range of hoods suitable for all kitchen and cooking needs. Whisper-quiet operation ensures your kitchen is cleared of cooking odours efficiently and quietly.

PERFEKT IN FORM UND FUNKTION

Design Control

Stunning hoods.

Design flexibility.
AEG-Electrolux have an extensive range of cooker hoods to suit all needs, whether you want to be discreet or make a bold design statement. Integrated, canopy and telescopic hoods can be discreetly concealed to blend in with your kitchen furniture, while our designer or chimney hoods are designed for maximum visual impact.

Hood types.
Designer hood. For those who want to create a stunning centrepiece in the kitchen, award-winning designer hoods from AEG-Electrolux.

Island hood. Suspended from the ceiling over a cooking station, the hood becomes the focal point of the kitchen. Ideal for installation with island units.

Chimney hood. Providing an attractive focal point in the kitchen, the chimney hood can be fitted between furniture or wall mounted.

Canopy hood. An attractive feature in the kitchen, the canopy hood is fitted & fixed into an island chimney, corner unit or wall cupboard.

Telescopic hood. Fitted & fixed into a 60cm wide furniture unit, with a shallow front cupboard. When in use it extends outwards beyond the cabinet and inwards for a flush finish when not in use.

Integrated hood. Fitted & fixed between wall units. Hidden by a furniture door, the hood is not visible, enhancing the appearance of the kitchen.

Halogen lamps.
This type of illumination on the hood provides excellent cooking visibility and can be used to provide soft lighting in the kitchen.

Hob lamps.
Illuminating the cooking areas for excellent cooking visibility, they can also be used to provide soft lighting in the kitchen.

Precise control for peace of mind.

Precise control.
AEG-Electrolux's powerful cooker hoods have a wide choice of different controls so you can adjust your extraction speed to suit every kitchen need, ensuring it is a fresher, more peaceful place to cook or relax. The electronic touch controls are stylish, simple with precise settings.

Automatic sensor control.
This ingenious sensor takes away the guesswork involved in selecting an extraction level. The sensor controls the intensity of the extraction, always working at the optimum level. They detect hob heat, ambient temperature and humidity levels and ensure that the hood works at exactly the right level to rid your kitchen of odours.

LED display.
Indicates extraction speed and when the charcoal filter or metal grease filter needs changing or cleaning.

Electronic variable speed control.
Precisely controls the rate of extraction, which can be varied to suit different types of cooking, providing optimum efficiency at minimal costs.

Variable speed control.
Allows the rate of extraction to be varied to suit different types of cooking, providing optimum efficiency at minimal cost.

Touch control.
Stylish, simple and precise electronic touch controls to adjust speed levels and hood lights.

Push button control.
Ideal for those who want just one touch control to adjust speed levels and hood lights.

Slider controls.
An easy way to use slider control to adjust speed levels and hood lights.

Performance Reassurance

For a peaceful kitchen environment.

AEG-Electrolux's powerful cooker hoods make a real difference to your whole kitchen environment, ensuring that it is a fresher, more peaceful place to cook or relax.

Whisper-quiet operation.
AEG-Electrolux hoods are quieter by design. AEG-Electrolux hoods give a higher extraction without a loud noise, creating a more peaceful kitchen environment.

Extraction rates.
This is the level at which the cooker hood clears cooking vapours from the kitchen environment. AEG-Electrolux cooker hoods are measured in cubic metres per hour and are in accordance with IEC standards.

Extraction mode. A ducting kit is attached to the hood to extract the cooking vapours externally, giving a pleasant kitchen environment, which is free from cooking odours.

Recirculation mode. The hood draws in the cooking vapours, filters the air through the charcoal filter and then recirculates the clean air back into the kitchen, leaving it free from cooking odours. For those hoods that do not come with a charcoal filter, it is available as an accessory.

Filters.
Long-life charcoal filter. This charcoal filter is used in recirculation mode to remove cooking smells. It may be washed in the dishwasher and dried in the oven.

Charcoal filter. This charcoal filter is used in recirculation mode to remove cooking smells. Needs replacing periodically.

Metal grease filters. The metal filter attracts the grease from cooking vapours, reducing odours, purifying the air and optimising performance. The filter is dishwasher-safe and never needs replacing.

Acrylic grease filter with saturation indicator. The filter absorbs grease from cooking vapours, producing cleaner air and reducing odours. Diagonal lines appear when the filter needs changing.
This efficient and simple measure maintains perfect hood performance and extends hood life.

Designer hood in stunning black glass.

DD9995B

- Stylish black glass hood
- Electronic touch controls with LED display
- Continuous motor with intensive setting

CONTROL
